Dear Sirs:

I respectfully request that you reject the NAB's petition 04-160.

I am a subscriber to XM radio, and willingly pay \$10 a month so that I can hear music and other programming via radio that is unavailable from my local radio stations. I was very excited to hear that XM was going to offer traffic and weather information for my hometown, Atlanta, Georgia later this year. I am now quite concerned that you, the FCC, would consider limiting the type of programming that I willingly pay for. It is important to me (and other XM subscribers) that you reject the NAB's petition, and allow XM and other satellite services to broadcast what they choose, and what their paying subscribers demand.

Thank you very much for allowing me to express my views.

Sincerely,

Donald M. Rogers
Marietta, GA
